The Arctic Institute after Ten Years:

A Dynamic Think Tank for a Changing Region

In a Snapshot

The annual global average temperature of the region is warmer than the past decade and will continue to rise over the next decade. By 2020, the average temperature will be 1.5°C higher than 2010.

The presence of sea ice in the region is decreasing, with the 2012 minimum extent being 39% lower than the 1981-2010 average.

Media Features:

Communications & Media

The Arctic Institute's communications strategy has evolved over the past decade. The TAI newsletter, launched in 2011, reaches over 50,000 subscribers and is distributed weekly.

Some Early Publications:

The Arctic Institute has published over 2400 articles since its inception in 2011. These publications cover a wide range of topics, including climate change, economic development, and indigenous rights.

Innovative First Projects:

TAI launched the Arctic Index in 2012, which ranks the Arctic region's top countries in terms of sustainability, governance, and economic performance.

The Mission Continues:

Over the past decade, TAI has continued to expand its partnerships with governments, businesses, and non-profits to achieve its mission.

Looking Forward to the Next Decade

Over the next decade, TAI will continue to work with its partners to address the challenges facing the Arctic region. This includes areas such as climate change, economic development, and indigenous rights.

TAI will continue to publish reports and conduct research to inform policy decisions and raise awareness about the Arctic region.

Partnerships with governments and businesses will remain a key focus, as TAI seeks to leverage the expertise of these organizations to achieve its mission.

TAI will continue to reach out to young leaders to inspire a new generation of Arctic experts.
